

VC 6000

VC 6000 is a professional steam cleaner to be used **specifically for car detailing**.

This professional steam cleaner was designed to constantly work at a **pressure of 8 bars** without ever lowering its performance.

VC 6000 is **compact and easy to handle**; it has a robust trolley where the accessories can be put away.

Proper steam sanitizing restores your car to its former glory and increases its commercial value. VC 6000 **takes care of your vehicle** with the utmost attention, both inside and outside. Steam regenerates the leather of seats, fabrics, plastics, carpets, inserts in natural and synthetic materials, glass, chrome and metals, mechanic components, without attacking the surfaces. It is possible to automatically add detergent during cleaning.

*No problem,
the steam will take care of it!*

One of the most challenging aspects of the car's cleaning is the cleaning of the air conditioning vents.

Steam is a great way to eliminate any odors in your car's air conditioning system. Even the seats can be as good as new.

VC 6000 not only removes dirt, but sanitizes both cloth and leather seats.

*You can choose
the most suitable detergent*

VC 6000 is equipped with 2 tanks, each one with a capacity of 5 L, so that the most suitable detergent for your car detailing can be chosen.

Impeccable interior cleaning

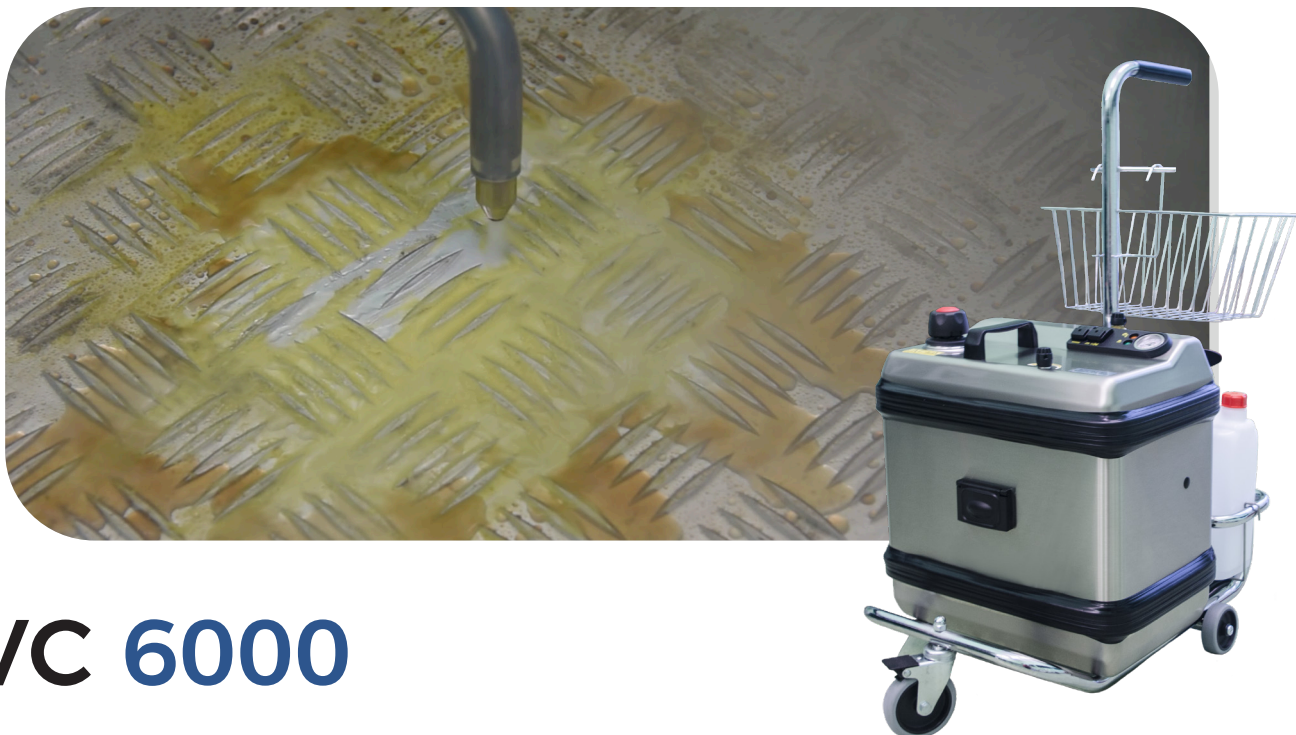

Using a professional steam cleaner like VC 6000 not only cleans stains from the seats, but also **sanitizes your car**, killing bacteria that can cause disease and neutralizing smoke odors.

You can also use this professional steam cleaner to clean objects inside your car, such as child safety seats or seat covers.

*Cleaning the exterior of the car
without damaging paint*

The steam generated by VC 6000 ensures 8 bars of constant pressure to remove grease and dirt out, but at the same time it is delicate so as not to damage your car's paint. Car washes that don't use steam cleaning usually waste between 100 and 150 liters of water to clean the body of just one car. With VC 6000 you can use less than 8 liters of water for one car, which is 93% less water than usual.

VC 6000

POWER SUPPLY	230 V (*120 V)
HEATING UP TIME, BEFORE USE	4 MINUTES (*12 min)
BOILER REFILL SYSTEM	AUTOMATIC REFILL
OPERATING PRESSURE	8 BARS
MAXIMUM TEMPERATURE	175 ° C
BOILER CAPACITY	1,8 L
