## AKR: the steam cleaner with a pressure of 6 bars for home cleaning

TPA Impex offers cutting-edge solutions in the field of steam cleaning. An example of one of the best steam cleaners is the AKR steam generator.

AKR is a cleaner with an unlimited range of use, which allows the user to always have full control of the cleaning operations, thanks to the practical zero volt handle and a wide range of patented accessories. AKR is equipped with an AISI 304 stainless steel boiler; it has an operating pressure of 6 bars and a steam temperature of 165°C. Thanks to the large number of accessories supplied with this steam cleaner you can deeply sanitize floors, grout lines between tiles, range hoods, the oven and the cooker hob, sofas, chairs, glasses, bathroom and shower without the use of harsh chemicals or detergents. Furthermore, the smart cable winder allows the user to unwind the power cable simply and quickly, when necessary.

*Continuous refill*

AKR is equipped with a continuous refill system. You will be able to sanitize without ever having to stop.

*Pressure of 6 bars*

AKR generates steam at a temperature of 165°C and at a pressure of 6 bars. The sanitizing power of steam allows different types of surfaces to be cleaned quickly and efficiently, ridding them of stubborn dirt.

*Smart cable winder*

The smart cable winder allows the user to unwind the power cable simply and quickly, when necessary.

*Pressure gauge*

The AKR steam cleaner with its stainless-steel boiler ensures the best sanitizing performance. The pressure can be constantly monitored thanks to the pressure gauge.

## *Zero Volt Handle*

The Zero Volt handle guarantees maximum operating safety thanks to the pneumatic system. It eliminates the hazard of coming into contact with electrical current, by eliminating any type of electrical connection between the machine and your hand, so as not to compromise safety.

## *Practical Accessories*

The AKR patented accessories ensure top level performance, avoiding the transmission of heat to the hand of the end user thanks to their particular internal structure which helps to dissipate the heat generated by steam.
